

Controlled chemical handling for food production facilities

The WETTASK* system can help your facility control chemical handling, optimise usage and reduce worker exposure. With its simple, effective and HACCP International endorsed dry-wiper and bucket system, simply add your own chemicals and reseal for an efficient and portable sanitising and disinfecting solution.

Controlled chemical handling with WETTASK* bucket wipers

Improved productivity

- Reusable bucket allows user to decide the chemical solution and saturation level needed
- Ready-to-use system saves considerable time and effort and is more portable than an open bucket or decanter system

Improved OH & S

- Helps prevent wiper and disinfectant cross-contamination as the wiper cannot be re-dipped into the bucket
- Reduced environmental footprint with less exposure to chemical vapours and lower VOC (volatile organic compounds) emissions
- Helps prevent accidental splashes that could lead to slip hazards

Improved efficiency

- Reduced loss of solution through drying and reduces wiper wastage
- Greater flexibility through use of and preferred chemicals
- Pre-saturated wipers offer improved efficiency over traditional spray bottles.

Hydroknit wipers are compatible with many chemicals, some solvents and sanitisers. Good absorption and tear resistance - no adhesive or binders reducing surface residue.

Meltblown wipers are ideal for use with solvents and disinfectants. Good solvent release properties, do not react with chemicals. Good abrasion resistance & low linting.

WETTASK* Wipers

Code	Description	Colour	Pack Contents	Sheet Size	Case Contents
06001	KIMTECH* WETTASK* Hydroknit Wipers	White	60 sheets roll	30.5cm x 31.8cm	6 rolls + 1 bucket
06411	KIMTECH* WETTASK* Meltblown Wipers	White	90 sheets roll	30.5cm x 31.8cm	6 rolls + 1 bucket
28646	KIMTECH* Industrial Bucket	Blue	-	-	4 buckets

ALSO AVAILABLE: KIMTECH* Industrial buckets - durable bucket dispenser with soft-closing lid mechanism and colour coded stickers for chemical labelling.
